

## KUTERRA SALMON

Environmentally sound, safe, healthy and delicious

Sustainable aquaculture system helps create the best possible environment for growing salmon. The result is a great-tasting fish that meets the most demanding requirements;

- It's high in good oils, which give it an extra rich flavour and moistness.
- It has a firm, pleasing texture that makes it easy to prepare and cook.
- It's harvested and transported quickly, so it's the freshest possible fish.
- It's sustainable and traceable. We can tell you exactly who on the Kuterra team raised your fish.

- Omega-3 fats
- Omega-6 fats
- Vitamin-D
- B-vitamins
- Antioxidants
- Quality protein

## Kuterra Salmon Facts

### Why is KUTERRA Land Raised™ salmon considered sustainable salmon?

Raising Salmon on land is an efficient, environmentally sustainable alternative to older industry methods:

- It eliminates the need for antibiotics.
- It protects the marine and land environment from contamination.
- It requires 30 percent less feed than older ocean fish farming methods.

### Is KUTERRA SALMON genetically modified?

No. KUTERRA Land Raised Atlantic salmon is not modified genetically. It is the same type of Atlantic salmon that was first caught and domesticated many decades ago. KUTERRA salmon grow quickly because our land-based facility offers the best conditions for salmon. The ideal temperature and water conditions and the absence of environmental threats mean that KUTERRA salmon have a low-stress environment, use feed more efficiently and grow faster than salmon growing in ocean pens.

Exceptional, sustainable, stress free, great tasting KUTERRA Salmon.
